Contents of Volume 40

Number 1, November 1, 1981

G. Ferey, M. LeBlanc, and R. de Pape. Crystal Structure of the Ordered Pyrochlore $NH_4FE^{II}FE^{III}F_6$ Structural Correlations with $Fe_2F_5 \cdot 2H_2O$ and Its Dehydration Product $Fe_2F_5 \cdot H_2O$ 1

P. F. González-Díaz and Priscila García-Fernández. Crystalline Structure and OH Torsional Motion in Calcium–Strontium Arsenate Apatites..... 8

M. N. Deschizeaux Cheruy et J. C. Joubert. Donnees cristallographiques sur une nouvelle serie de manganites mixtes de terre rare et d'alcalino-terreux ... 14

Maheshwar Sharon and R. R. Pradhananga. Ionic Conductivity of Pure and Ca^{2+}- and Sr^{2+}-Doped Single Crystals of LiCl 20

S. Kikkawa, M. Koizumi, S. Yamanaka, Y. Onuki, R. Inada, and S. Tanuma. Preparation of TaS_3 under High Pressure 28

S. S. Romdhane, G. Bacquet, et G. Bonel. Etude des phases β et haute pression du phosphate tricalcique par la RPE de l'ion Cu^{2+} 34

H. Taguchi, M. Shimada, and M. Koizumi. Magnetic Interactions in Ternary Cobalt Oxides with Cubic Perovskite Structure..... 42

M. Drofenik, L. Golič, D. Hanžel, V. Kraševec, A. Prodan, M. Bakker, and D. Kolar. A New Monoclinic Phase in the Fe_2O_3–TiO_2 System. I. Structure Determination and Mössbauer Spectroscopy 47

V. Kraševec, A. Prodan, M. Bakker, M. Drofenik, L. Golič, D. Hanžel, and D. Kolar. A New Monoclinic Phase in the Fe_2O_3–TiO_2 System. II. The Defect Structure..... 52

M. Pai and J. M. Honig. Electrical and Thermoelectric Properties of Undoped MnO Single Crystals 59

H. D. Lutz and G. Kliche. Lattice Vibration Spectra. XXVI. Far-Infrared Spectra of the Ternary Skutterudites $CoP_{3-x}As_x$, $CoAs_{3-x}Sb_x$, and $MGe_{1.5}Y_{1.5}$ (M = Co, Rh, Ir; Y = S, Se)..... 64

B. Jolibois, G. Laplace, F. Abraham, and G. Nowogrocki. Monoclinic–Trigonal Transition in Some $M^{I}_{3}M'^{III}(XO_4)_3$ Compounds: The High Temperature Form of $(NH_4)_3In(SO_4)_3$..... 69

Thommy Ekström, E. Salje, and R. J. D. Tilley. Phase Relations in the Ternary W—Mo—O System 75

N. G. Eror and U. Balachandran. Self-Compensation in Lanthanum-Doped Strontium Titanate 85

T. P. Perng, N. Kimizuka, and H. Steinfink. Phase Relations of Ternary Compounds in the Ba–Fe–S System 92

Patrick Maestro, Gerard Demazeau, et Michel Pouchard. La solution solide $Cr_{1-x}Ir_xO_2$ 101

Noboru Kimizuka and Eiji Takayama. $Ln(Fe^{3+}, M^{2+})O_4$ Compounds with Layer Structure [Ln: Y, Er, Tm, Yb, and Lu, M: Mg, Mn, Co, Cu, and Zn] 109

N. K. Appandairajan, B. Viswanathan, and J. Gopalakrishnan. Lithium-Substituted Cobalt Oxide Spinels $Li_xM_{1-x}Co_2O_4$ (M = Co^{2+}, Zn^{2+}; $0 \leq x \leq 0.4$)..... 117

SAFIA MEHDI AND S. MUMTAZ ANSARI. X-Ray Study of Hg_2Cl_2–Br_2 and $HgCl_2$–$HgBr_2$ Reactions in Solid State 122
ABSTRACTS OF FORTHCOMING ARTICLES 128

Number 2, November 15, 1981

S. MAAREF, R. MADAR, P. CHAUDOUET, J. P. SENATEUR, AND R. FRUCHART. Crystal Chemistry of $M_{12}P_7$ Phases in Relation with the M_2P Phosphides 131
S. K. E. FORGHANY AND J. S. ANDERSON. Reduction of the Titanium Niobium Oxides. I. $TiNb_2O_7$ and $Ti_2Nb_{10}O_{29}$ 136
S. K. E. FORGHANY AND J. S. ANDERSON. Reduction of the Titanium Niobium Oxides. II. $TiNb_{24}O_{62}$ 143
J. C. TROMBE AND G. MONTEL. On the Existence of Bivalent Ions in the Apatite Channels: A New Example—Phosphocalcium Cyanamido-Apatite 152
JACQUES CHOISNET, DANIEL CORNET, JEAN-FRANÇOIS HEMIDY, NINH NGUYEN, ET YVES DAT. Etude spectroscopique des ions cuivre (II) en coordinence tétraédrique dans les silicates synthétiques de type milarite 161
T. ISHIGURO, A. KITAZAWA, N. MIZUTANI, AND M. KATO. Single-Crystal Growth and Crystal Structure Refinement of $CuAlO_2$ 170
PAUL POIX. Etude comparative des structures type K_4NiF_4 et pérovskite par la méthode des invariants 175
ICHIMIN SHIROTANI, AKIFUMI ONODER, AND YOJI HARA. Electrical Conduction of Bis(1,2-diondioximato)metals(II) and Their Partially Oxidized Complexes at High Pressures 180
TADASHI SUGIHARA, SHENG H. LIN, AND LEROY EYRING. The Kinetics of Oxidation of ϕ-Phase Terbium Oxide: $\frac{7}{2}Tb_2O_{3+\delta} + (\frac{3}{4} - \frac{7}{4}\delta)O_2 \rightarrow Tb_7O_{12}$ 189
J-F. MARUCCO AND A. HTIWECH. Thermodynamic Study of Nonstoichiometric Tungsten trioxide WO_{3-x} by EMF Measurements at High Temperature 197
T. J. BASTOW AND H. J. WHITFIELD. NQR Study of Ternary Chalcogenides A_3BX_3, ABX_2, and ABX Where A = Cu, Ag, or Tl, B = As or Sb, and X = S or Se .. 203
A. ORTIZ, A. GONZALEZ, AND J. I. FERNANDEZ-ALONSO. Optical Spectra and Magnetic Susceptibility of Two Different Salts of Several Phenothiazine Derivatives 210
EMILIA GARCÍA-CLAVEL, ISABEL TEJEDOR TEJEDOR, AND HERMÓGENES G. SANZ. Mechanism of the Powder Reaction between $CuSO_4$(s) and PbO (α and β): A Thermoanalytical and Mass Spectrometric Study 219
TADASHI SUGIHARA, SHENG H. LIN, AND LEROY EYRING. A Kinetic Study of the Oxidation of ζ Phase Praseodymium Oxide: $\frac{10}{9}Pr_9O_{16} + \frac{1}{3}O_2 \rightarrow Pr_{10}O_{18}$ 226
M. A. ENRIQUEZ, C. DORÉMIEUX-MORIN, AND J. FRAISSARD. Application of Nuclear Magnetic Resonance to the Study of the Superficial Constitutive Water of Anatase 233
DAVID A. MACCLEAN, KAN SETO, AND J. E. GREEDAN. Electrical Resistivities of Single-Crystal $PrTiO_3$ and $NdTiO_3$. Magnetic Properties of $PrTiO_3$, $NdTiO_3$, $PrScO_3$, and $NdScO_3$ 241
NOTE
M. BAGIEU-BEUCHER, A. DURIF, AND J. C. GUITEL. $Ba_2Zn_3P_{10}O_{30}$, the First Example of a Decametaphosphate Ring 248
ABSTRACTS OF FORTHCOMING ARTICLES 249

Number 3, December 1981

E. Riedel, R. Karl, and R. Rackwitz. Mössbauer Studies of Thiospinels. V. The Systems $Cu_{1-x}Fe_xMe_2S_4$ (*Me* = Cr, Rh) and $Cu_{1-x}Fe_xCr_2(S_{0.7}Se_{0.3})_4$ 255

Cumulative Subject Index for Volumes 36–40..... 374

Information for Authors

The *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, electronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions are both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of this or her contributions to the journal.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Manuscripts should be submitted to the Editor (M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5×28 cm paper. Headings of major sections should be typed in capital letters and centered on the page. Each page of the manuscript should be numbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For multiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should consist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's *Handbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding matters of style and abbreviation.

Tables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation in the text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, lower-case italic letters (^{a,b,c}). Tables longer than two manuscript pages should be submitted as clear, sharp glossy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page after 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

Auxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be deposited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must be deposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page (this corresponds to a limit of about 1000 F_o and F_c).

For material to be deposited, a deposit fee of $25.00 for up to 98 pages of standard-size or 49 pages of oversize deposited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposited material are supplied to the authors by the Editor at the time a paper is accepted for publication. The following footnote (wherein missing numbers are to be inserted by the author in page proof) should be used to reference deposited material.

See NAPS document No. ___ for ___ pages of supplementary material. Order from ASIS/NAPS, Microfiche Publications, P.O. Box 3513, Grand Central Station, New York, NY 10163. Remit in advance $4.00 for microfiche copy or for photocopy, $7.75 up to 20 pages plus $.30 for each additional page. All orders must be prepaid. Institutions and Organizations may order by purchase order. However, there is a billing and handling charge for this service of $15. Foreign orders add $4.50 for postage and handling, for the first 20 pages, and $1.00 for additional 10 pages of material. $1.50 for postage of any microfiche orders.

Figures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5×28 cm. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be planned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible after reduction of the figure to single-column width. The difference in type size within a figure should be no more than approximately 15%. The caption of each axis should be lettered parallel to its axis. Background grids should not be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. Each figure should be identified on the back with the author's name and figure number. Figures are to be cited in the text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten with an Arabic number if necessary for reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)."

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separate page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. The references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citation in the text. After the reference number, the author's initials, last name, journal name, volume, initial page number, and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style of *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quotes), Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and year of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms for reprints. There is no page charge.
